

**Enable Ireland teams support children from all over Ireland – but this year we’ve had some very special visitors come from the North Pole!**

This Little Elf was getting into trouble in the workshop because he found it hard to finish each job before moving on to something else.

He told our Occupational Therapist (OT) that his some days his body feels all ‘hoppy’ and he just can’t sit still. The OT had a chat with the senior elves and she thinks that Little Elf has some sensory issues that are affecting his attention and concentration skills.

The OT made a special pressure vest for Little Elf to use when he feels ‘hoppy’. He tells us that it helps him feel calm and to get his work done. He really likes it.
