

## Colouring

1. Start at the edge

2. Watch where you are colouring

3. Slow short lines (strokes) at the edge. Use a finger to block the edge if you are in danger of crossing the line. Move the pencil "backward forward".

4. Long faster lines (strokes) in the middle
5. Keep a steady pressure on the pencil. It is faster colouring if you can lean a little softer, so that the colour comes out a lighter shade.
6. Keep going until there is no white left.
