

My Coronavirus Story

What is Coronavirus?

Coronavirus is a virus that can make people feel unwell.

It's a bit like a cold or the flu.

Coronavirus can also be called Covid 19.

Coronavirus

COVID-19

You can't see Coronavirus because it is so small.

When people have the coronavirus they might have:

Sore throat

Fever

Shortness of breath

How to get better?

Most people will stay at home in bed. They will stay away from other people.

Some people will have to go to the hospital to get better.

I can help by:

Washing my hands

Using hand sanitiser

Coughing and sneezing into my elbow

Use a tissue to wipe my nose

Listening to what adults tell me to do.

To help stop the germs, everyone must stay at home as much as possible.

This means:

No school

No visiting

No parties

I can't go to some of my favourite places like:

List or insert pictures of places relevant to your child (e.g. McDonalds).

When the coronavirus is gone, school will open again. We can go back to my favourite places.

We can still do important things like:

Get the shopping.

Go to work

Do our homework

We must do what the government tell us.

Some people can catch Coronavirus, and not feel sick.

But, you can give it to other people.

Because of this, you might not be able to see some people like

List or insert pictures of people relevant to your child (e.g. grandmother).

This is to protect them.
